

Information for parents from CDC

What are VFCs?

The Vaccines for Children (VFC) program offers vaccines at no cost to eligible children through health care providers enrolled in the program. Since 1994, parents have been protecting their children through the VFC Program. This program provides free vaccines to children whose parents need help paying for them.

VACCINES FOR CHILDREN PROGRAM VFC

UWAGA: Jeżeli mówisz po polsku, możesz skorzystać z bezpłatnej pomocy językowej. Zadzwoń pod numer 618-826-4581 (TTY: 7-1-1).

Is my child eligible for the VFC Program?

Your child is eligible if it is before his or her 19th birthday, and if he or she is one of the following:

- **Title 19 Medicaid Patients**
- **Uninsured**
- **American Indian or Alaska Native**
- **Underinsured** (Underinsured children are only eligible for VFC Vaccines through Federally Qualified Health Centers and Rural Health Clinics.)

What do you mean by “underinsured?”

Underinsured means your child has health insurance, but it won't cover the vaccine(s) because:

- It doesn't cover any vaccines.
- It doesn't cover certain vaccines.
- It covers vaccines, but it has fixed dollar limit or cap for vaccines. Once that fixed dollar amount has been reached, your child is eligible.

How much will I have to pay?

All vaccines are free through the VFC Program at Memorial Hospital's Chester Clinic.

Where can I go to get my child vaccinated?

Memorial Hospital's Chester Clinic providers participate in the VFC Program.
